

LENSURF MICRO-LENSES

Ultra fast Lens surface 3D profile acquisition

Fastest of the market, using video acquisition rate per FOV on a multi-axis stage in continuous flight mode (no z scan)

PROCESS CONTROL

- ✓ Full lens profile mapping on individual lens
- ✓ Profile deviation calculation from theoretical model
- ✓ Shape, Roughness, apex centering & tilt/centering
- ✓ Center thickness/gap between lenses in an assembled objective
- ✓ Simultaneous top and bottom apex localization of a lens, without flipping the sample

APPLICATIONS

- ✓ Small form factor optical devices
- ✓ Mold Insert
